

A benchmark
in the World

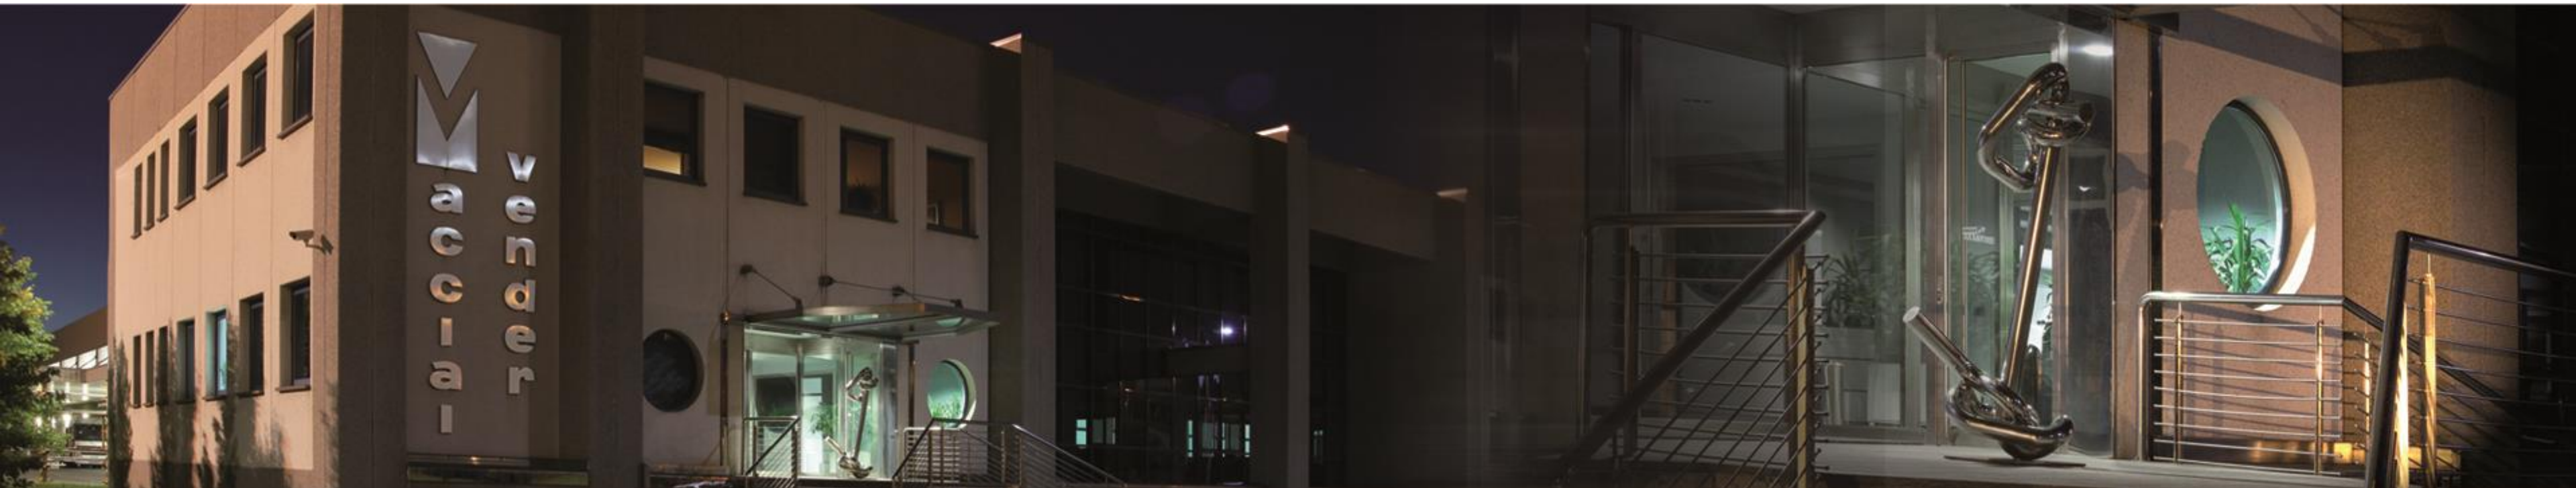

The stainless steel reality

Since 1976, the year of its establishment, Acciai Vender is specialized in the distribution and processing of stainless steel, and it has become over the years leader of the Italian and European market.

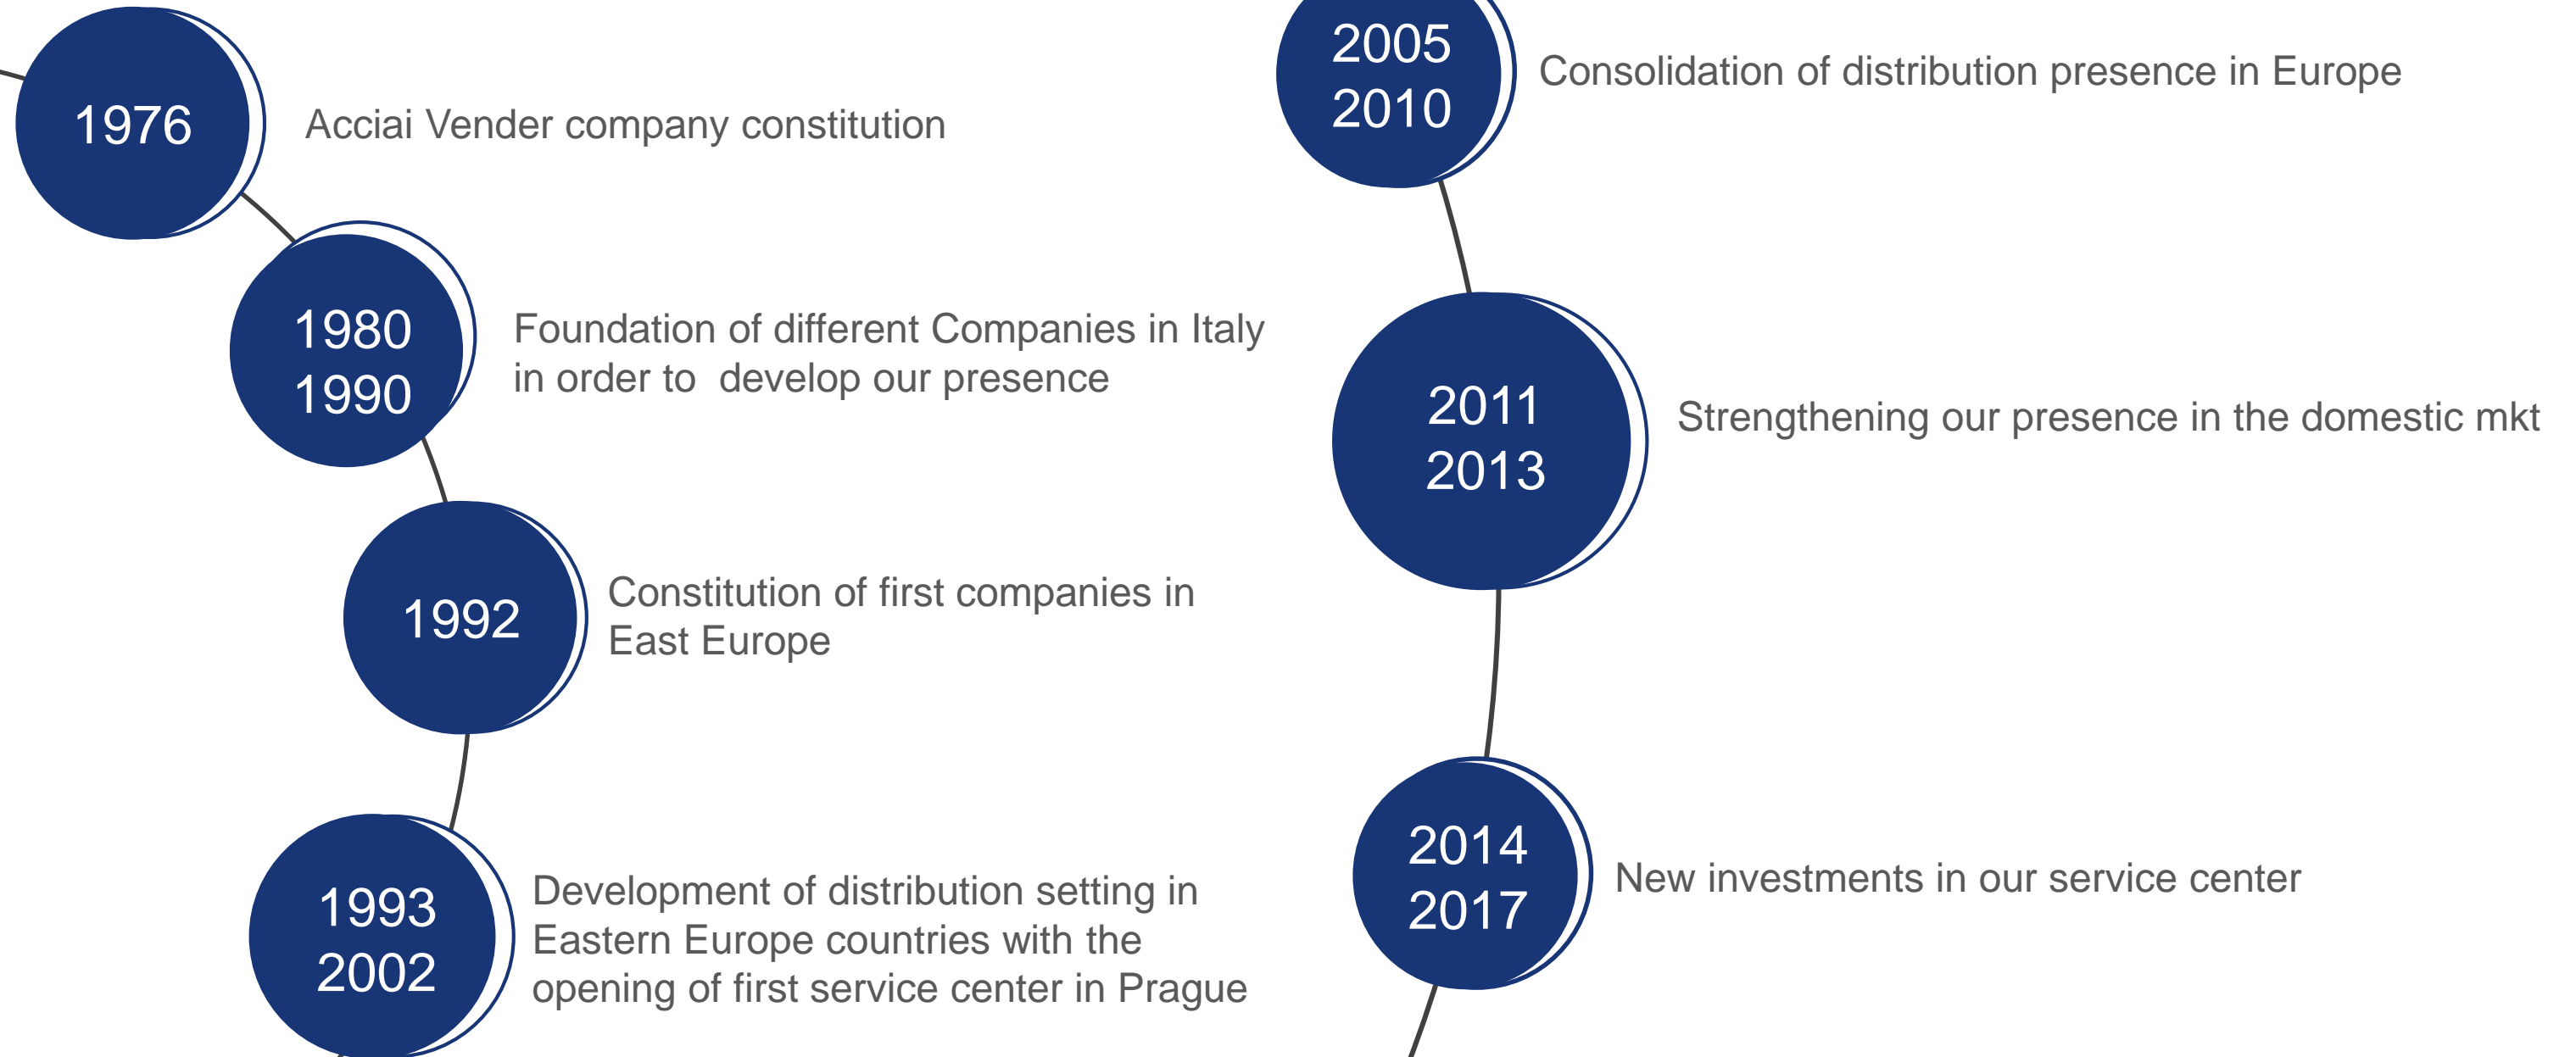

Through continuous research of innovative solutions, it has reached a high quality standard in assortment, offering a full range of flat products, coils and plates, hot rolled and cold material of austenitic, ferritic, martensitic and duplex steel. Either in standard sizes or cut to size.

The aim to extend the business in terms of production capacity, emerged into the need of new investments in order to increase and renew the existing large high-technologies machineries. Grinding, scotch brite, mirror polishing, duplo, tampico, flower embossing, are only some of the surface treatments performed mechanically on the production lines.

The constant selection in supplying raw materials, has achieved excellent results in the strategic choice of suppliers, establishing solid business relationships with the largest producers of stainless steel worldwide.
